Index of Authors

Ager, David J., 195
Amabilino, David B., 342
Andersson, Pher G., 223
Ansell, Jeffrey, 259
Bates, Roderick W., 12
Bertilsson, Sophie K., 223
Boersma, Jaap, 357
Brocklehurst, Brian, 301
Brunschwig, Bruce S., 168
Calero, Sofia, 185
Clark, Andrew J., 1
Collinson, Simon R., 147
Cooke, Graeme, 275
Creutz, Carol, 168
Dehli, Juan R., 365
Dent, Andrew J., 83
Desfrançois, Charles, 269
Evans, John, 83
Feilberg, K. L., 313
Gotor, Vicente, 365
Gravestock, David, 195
Guldi, Dirk M., 22
Hagen, Henk, 357
Henriksen, Niels E., 37
Jacox, Marilyn E., 108
Johnson, M. S., 313
Kim, Kimoon, 96
King, Amy S. H., 69
Koch, H. Fred, 60
Koh, Carolyn A., 157
Krishna, Rajamani, 185
Kumar, Krishna, 335
Lin, Zhenyang, 239
Magnus, Angelika, 223
Martin, Ian K., 69
Martin, Philip A., 201
Mehta, Goverdhan, 324
Monti, Sandra, 287
Newton, Mark A., 83
Nielsen, O. J., 313
Pérez-García, Lluïsa, 342
Resch-Genger, Ute, 116
Rotello, Vincent M., 275
Roundhill, D. Max, 60
Rurack, Knut, 116
Satcharoen, Vachiraporn, 12
Schermann, Jean Pierre, 269
Singh, Vishwakarma, 324
Smit, Berend, 185
Smith, Ian W. M., 137
Sortino, Salvatore, 287
Spivey, Alan C., 43
Sutin, Norman, 168
Sweeney, J. B., 247
Todd, Matthew H., 211
Tucker, James H. R., 147
Twyman, Lance J., 69
van Koten, Gerard, 357
van Staden, L. Frances, 195
von Hessberg, P., 313
Wainwright, Mark, 128
Walton, Richard I., 230
Weston, Matthew, 43
Wills, Martin, 259
Woodhead, Steven, 43
Yoder, Nicholas C., 335

Index of Titles

Atom transfer radical cyclisation reactions mediated by copper complexes **Andrew J. Clark** 1–11

Nucleophilic transition metal based cyclization of allenes **Roderick W. Bates and Vachiraporn Satcharoen** 12–21

Fullerene–porphyrin architectures; photosynthetic antenna and reaction center models **Dirk M. Guldi** 22–36

Laser control of chemical reactions **Niels E. Henriksen** 37–42

Celastraceae sesquiterpenoids: biological activity and synthesis **Alan C. Spivey, Matthew Weston and Steven Woodhead** 43–59

Methods and techniques for the selective extraction and recovery of oxoanions **D. Max Roundhill and H. Fred Koch** 60–67

Catalysis inside dendrimers **Lance J. Twyman, Amy S. H. King and Ian K. Martin** 69–82

Bringing time resolution to EXAFS: recent developments and application to chemical systems **Mark A. Newton, Andrew J. Dent and John Evans** 83–95

Mechanically interlocked molecules incorporating cucurbituril and their supramolecular assemblies **Kimoon Kim** 96–107

The spectroscopy of molecular reaction intermediates trapped in the solid rare gases **Marilyn E. Jacox** 108–115

Rigidization, preorientation and electronic decoupling—the 'magic triangle' for the design of highly efficient fluorescent sensors and switches **Knut Rurack and Ute Resch-Genger** 116–127

The emerging chemistry of blood product disinfection **Mark Wainwright** 128–136

The Liversidge Lecture 2001–02. Chemistry amongst the stars: reaction kinetics at a new frontier **Ian W. M. Smith** 137–146

Recent developments in the redox-switched binding of organic compounds **James H. R. Tucker and Simon R. Collinson** 147–156

Towards a fundamental understanding of natural gas hydrates **Carolyn A. Koh** 157–167

Optical transitions of symmetrical mixed-valence systems in the Class II–III transition regime **Bruce S. Brunschwig, Carol Creutz and Norman Sutin** 168–184

Entropy effects during sorption of alkanes in zeolites **Rajamani Krishna, Berend Smit and Sofia Calero** 185–194

Index of Titles continued on page 373

Entropy effects during sorption of alkanes in zeolites **Rajamani Krishna, Berend Smit and Sofia Calero** 185–194

Index of Titles continued on page 373

Index of Titles continued from page 372

New developments in the Peterson olefination reaction **L. Frances van Staden, David Gravestock and David J. Ager** 195–200

Near-infrared diode laser spectroscopy in chemical process and environmental air monitoring **Philip A. Martin** 201–210

Asymmetric autocatalysis: product recruitment for the increase in the chiral environment (PRICE) **Matthew H. Todd** 211–222

Asymmetric base-mediated epoxide isomerisation **Angelika Magnus, Sophie K. Bertilsson and Pher G. Andersson** 223–229

Subcritical solvothermal synthesis of condensed inorganic materials **Richard I. Walton** 230–238

Structural and bonding characteristics in transition metal–silane complexes **Zhenyang Lin** 239–245

Aziridines: epoxides' ugly cousins? **J. B. Sweeney** 247–258

Enantioselective catalysis using phosphorus-donor ligands containing two or three P–N or P–O bonds **Jeffrey Ansell and Martin Wills** 259–268

Structural dependence of electron transfer to non-covalent polar complexes **Charles Desfrançois and Jean Pierre Schermann** 269–274

Methods of modulating hydrogen bonded interactions in synthetic host–guest systems **Graeme Cooke and Vincent M. Rotello** 275–286

Photoprocesses of photosensitizing drugs within cyclodextrin cavities **Sandra Monti and Salvatore Sortino** 287–300

Magnetic fields and radical reactions: recent developments and their role in nature **Brian Brocklehurst** 301–311

Isotopic processes in atmospheric chemistry **M. S. Johnson, K. L. Feilberg, P. von Hessberg and O. J. Nielsen** 313–323

Hybrid systems through natural product leads: An approach towards new molecular entities **Goverdhan Mehta and Vishwakarma Singh** 324–334

Fluorinated amino acids in protein design and engineering **Nicholas C. Yoder and Krishna Kumar** 335–341

Spontaneous resolution under supramolecular control **Lluïsa Pérez-García and David B. Amabilino** 342–356

Homogeneous vanadium-based catalysts for the Ziegler–Natta polymerization of α-olefins **Henk Hagen, Jaap Boersma and Gerard van Koten** 357–364

Parallel kinetic resolution of racemic mixtures: a new strategy for the preparation of enantiopure compounds? **Juan R. Dehli and Vicente Gotor** 365–370

Additions and corrections 371
